

# December 2017 Market Statistics for Ada and Canyon Counties

Report provided by Boise Regional REALTORS®

Data from the Intermountain MLS as of January 11, 2018

## Monthly Analysis

Ada County hit another record low for inventory in December 2017, with just 1,391 homes for sale – a 6.6% drop from December 2016. While we've discussed the lack of inventory at length in our previous market reports, a new twist on the inventory shortage showed up in the December 2017 numbers...

There were 317 more new homes for sale in Ada County in December 2017 than existing homes. The actual numbers reported for Ada County were 854 new homes, compared to 537 existing homes on the market in December 2017.

Looking back at the year, there were five months that this happened, but December 2017 had the largest spread. (We saw this once in December 2016, but never before then in our ten-year data set.)

As reported by the National Association of REALTORS® (NAR), we need builders to bring more product online to pull us out of our local – and nationwide – inventory shortage, so an increase in new construction is welcomed.

But some question if this strategy could lead to another wave of overbuilding like we saw in the mid-2000s. At that time, new construction was more speculative, which led to more new houses than there was demand. Today's new construction inventory levels are much more in line with buyer demand for new homes, which has increased with the Boise region's population growth.

The Months Supply of Inventory figures for new construction in Ada County over the past 4-5 years indicate a general balance between supply and buyer demand. In December 2017, the months supply of new homes was at 4.1 months. A balanced market—not favoring buyers or sellers—is typically between 4-6 months of supply.

That's a good starting point for builders, as they're not too far behind demand right now. Although, we did see the months supply of new homes dip below 4.0 months last summer, so the more product that can get started now, the better.

A mix of price points among newly constructed homes will also be necessary, but that's proved difficult with the rising cost of land, labor, and materials. This was evident in December 2017, as Ada County's median sales price for new homes saw a record high of \$361,030, up 13.5% from December 2016. (In comparison, the median sales price of existing homes in Ada County was at \$254,250 in December 2017.)

### Months Supply of New Construction Inventory by Price Range

### Explanation of Metrics

Closed Sales – A count of the actual sales that have closed; Median Sales Price – The price at which half the homes sold for more, and half sold for less; Days on Market – Average, cumulative number of days between when a property is listed and when it goes pending; Pending Sales – A count of the homes that were under contract, and should close within 30-90 days; Inventory – A count of the homes for sale on the 11th day of a given month following the one reported; Months Supply of Inventory – Takes the number of homes for sale divided by the average number of closed sales by month for the preceding twelve months. A balanced market—not favoring buyers or sellers—is typically between 4-6 months of supply. || Copyright © 2017 Boise Regional REALTORS®

### Notes on Data Sources and Methodology

Year-over-year percent changes may look extreme due to small sample sizes. The information in this report is based primarily on the public statistics provided by the Intermountain MLS (IMLS), a subsidiary of Boise Regional REALTORS® (BRR), available here: [intermountainmls.com/Statistics/Static.aspx](http://intermountainmls.com/Statistics/Static.aspx). These statistics are based upon information secured by the agent from the owner or their representative. The accuracy of this information, while deemed reliable, has not been verified and is not guaranteed. These statistics are not intended to represent the total number of properties sold in the counties or cities during the specified time period.
