Inventory	45	44	-2.2%	--	--	--
Months Supply of Inventory	1.5	2.1	40.0%	--	--	--

Months Supply of Inventory by Price Range

Explanation of Metrics and Notes on Data Sources and Methodology

*The sales price reported is based on a rolling 12-month median. This smooths out potential month-over-month swings due to seasonality, a very high or low number of transactions in one month, very high or low sales prices that may occur one month but are not common, or other activity that may not be representative of the overall price trends for the area or market segment. || Note that some year-over-year percent changes may look extreme due to small sample sizes. || Closed Sales – A count of the actual sales that have closed; Median Sales Price – The price at which half the homes sold for more, and half sold for less; Days on Market – Average, cumulative number of days between when a property is listed and when it goes pending; Pending Sales – A count of the homes that were under contract, and should close within 30-90 days; Inventory – A count of the homes for sale on the 11th day of a given month following the one reported; Months Supply of Inventory – Takes the number of homes for sale divided by the average number of closed sales by month for the preceding twelve months. A balanced market—not favoring buyers or sellers—is typically between 4-6 months of supply. NOTE: Due to the small number of newly constructed homes in the area, data is reported only for existing/resale and new construction combined.

The information in this report is based primarily on the public statistics provided by the Intermountain MLS (IMLS), a subsidiary of Boise Regional REALTORS® (BRR), available here: intermountainmls.com/Statistics/Static.aspx. These statistics are based upon information secured by the agent from the owner or their representative. The accuracy of this information, while deemed reliable, has not been verified and is not guaranteed. These statistics are not intended to represent the total number of properties sold in the counties or cities during the specified time period. The IMLS and BRR provide these statistics for purposes of general market analysis but make no representations as to past or future performance. || The term "single-family homes" includes detached single-family homes with or without acreage, as classified in the IMLS. These numbers do not include activity for mobile homes, condominiums, townhomes, land, commercial, or multi-family properties (like apartment buildings). To reduce errors, only data falling within three (3) standard deviations from the mean have been included in the report. || For questions, please contact Breanna Vanstrom, Chief Executive Officer of Boise Regional REALTORS®, at breanna@boirealtors.com. Market reports are released on or after the 12th calendar day of each month, and will be available here: boirealtors.com/category/market-info. || If you are a consumer, please contact a REALTOR® to get the most current and accurate information specific to your situation. You can find a REALTOR® at intermountainmls.com/Agents/Searchagents.aspx. || Copyright © 2018 Boise Regional REALTORS®
