\* The sales price reported is based on a rolling 12-month median instead of monthly activity or year-to-date starting on January 1. This smooths out potential month-over-month swings due to seasonality, a very high or low number of transactions in one month, very high or low sales prices that may occur one month but are not common, or other activity that may not be representative of the overall price trends for the area or market segment. || Some year-over-year percent changes may look extreme due to small sample sizes. The Months Supply Inventory metric is manually calculated. These statistics are based upon information secured by the agent from the owner or their representative and reported to the Intermountain MLS (IMLS), a subsidiary of Boise Regional REALTORS® (BRR). The accuracy of this information, while deemed reliable, has not been verified and is not guaranteed. Further, past performance may not be indicative of future results. These statistics are not intended to represent the total number of properties sold in the geography noted during the specified time period. The IMLS and BRR provide these statistics for purposes of general market analysis but make no representations as to past or future performance.
